2 Approaches to Formation Flying

Much like the U.S. Navy Blue Angels who fly in formation; EO-1 and Landsat-7 spacecraft are able to gather data from the Earth's orbit and beyond.

EO-1

Earth Observing-1

EO-1 flies over same scene as Landsat-7 one minute later testing new technologies for *future space missions. The advanced* imaging instruments on EO-1 help us better *understand planet Earth so we will* be able to take better care of it.
