

AMS hot pixels, MODIS hot pixels and EO-1 ALI Burn Scars

Monitoring Ikhana Overflight on July 19, 2008 in Realtime

The screenshot displays a Google Earth interface with a 3D topographic map. A white airplane icon is positioned over a red line representing a flight path, with the label "IKHANA" above it. The map shows a valley with a river and surrounding terrain. A red outline highlights a specific area on the map. The interface includes a search bar at the top left with the text "Fly to e.g., 1600 Pennsylvania Ave, 20006". Below the search bar is a "Places" list with the following items:

- ✓ Ikhana Flight Path 3
- ✓ Ikhana Flight Pat 4
- ✓ [EO1 ALI Burn Scar Overlay](#)
EO1 ALI L1G 9-6-4 Overlay
Red indicated burned area
- ✓ [EO-1 ALI view 2](#)
Fly through Cub complex fire
- EO-1 ALI view 3

The "Layers" list on the left includes:

- Primary Database
- Geographic Web
- ✓ Roads
- 3D Buildings
- Street View
- ✓ Borders and Labels
- Traffic
- Weather
- Gallery
- Global Awareness

The status bar at the bottom shows the following information:

- Coordinates: 39°51'50.26" N 121°18'46.52" W
- Elevation: elev 1073 m
- Eye alt: 10.58 km

Current EO-1 Schedule

[KML file available here](#)

The screenshot displays a web-based EO-1 mission schedule interface. The main component is a world map with various colored markers: red circles for SensorWeb, green circles for Observation, and grey circles for Downlink. Two red markers are visible in the United States, and several green markers are scattered across Europe, Africa, Asia, and South America. A legend at the bottom identifies these markers. Below the legend, there are links for 'TIMELINE', 'TABLE', and 'TILES', and a '20 Items' indicator. A Google Earth window is overlaid on the bottom right, showing a detailed view of Monterey Bay with a red marker and a flight path. The Google Earth interface includes a search bar, a 'Fly To' field, and a 'Places' list containing 'Monterey Bay'.
